WHO: Engineering undergraduate students from any college or university.

WHEN: February 10-12, 2011

WHERE: Hyatt Regency La Jolla in San Diego, California

WHAT: A design competition that evaluates the seismic performance, financial benefits, structural innovation, and architectural design of a building.

WHY: Supplement your undergraduate education with this exciting, and thought-provoking experience. You will develop your creativity, knowledge of engineering, classmate camaraderie, and network with students, professors, and professionals from all over the country.

PROCESS:
Step 1: Assemble a team and register by November 19th, 2010.
Step 2: Design and build a scaled commercial office building out of balsa wood to maximize floor space and minimize seismic damage.
Step 3: Bring the building to the EERI Annual Meeting in San Diego in February 2011 and watch your building perform on a shake-table in front of other students, faculty, and professionals.

REGISTRATION DEADLINE: November 19, 2010
