Primary goal for the workshop retreat

To generate a strategic plan of action for EERI vis-à-vis school seismic safety that will engage a significant number of EERI members, be implemented over a multi-year timeframe, and utilize best practices shared in pre-retreat activities.
Purpose of pre-retreat Webinars

- Ensure that all participants have background knowledge of best practices activities across the country
- Allow time in Alaska to be focused on identifying priorities and action steps, not best practice sharing
- Kick start thinking about this topic in advance of Alaska so that we hit the ground running at the retreat
- Establish a camaraderie and inform each other the vast expertise within our group
