Overview of topic and how it affected various regions

• Key facilities affected:

State: Mexico

Date: 09/08/2017
Questions that a reconnaissance team could look into

• Does Mexico require that schools be designed to a higher performance standard?
• Were there mandatory retrofits for existing older schools to meet a certain performance objective?
• If there were mandatory retrofits, how did these schools perform?
• What role were schools assumed to play in a post-disaster situation?
• What role did the schools actually play after the earthquake?
• For future: what is the timeline for schools reopening? (i.e. after the Central Italy earthquake schools were opened in tents because they were a high priority for communities)
