STUDENT CHAPTER VISIT PLANNING COMMITTEE

LEAD ORGANIZER(S):

- Guanbo Bian, President, bian@jhu.edu
- Xilei Zhao, Vice president, xzhao29@jhu.edu

FACULTY ADVISOR:

- Professor Judy Mitrani-Reiser

VISITING PROFESSIONAL LECTURE OVERVIEW

Engineering students learn a lot about analyzing structures, designing systems and connections and other tools to be successful as a practicing engineer in the real world. In real life, engineers have a tremendous impact on our society. The profession plays a major role affecting important issues such as sustainability, public safety, the aesthetics of our built environment, community resilience and recovery from disasters, preservation of historic structures and client’s needs for a viable facility. In the presentation, Mr. David Cocke explained some of their philosophy and strategies with their projects.
Lecture Abstract

Mr. David Cocke reviewed several case studies including the Annenberg Center for Performing Arts in Beverly Hills, 3Labs, Agensys and the historic Masonic Temple and the Wilshire Boulevard Temple restoration projects. David also introduced their latest work with community resiliency involving post-disaster inspection programs. During this seminar, David showed us how a wide diversity of projects can provide engineers with the opportunities to contribute to a better future and how our passion can lead to your success.

Professional Bio

David Cocke, S.E., F. SEI, F. ASCE, founded Structural Focus in Los Angeles in 2001 after 20 years at a previous firm in California. He is a registered structural engineer in a dozen states and has an expertise in seismic evaluation, historic preservation, retrofit design and new structural design. Some of David's more notable projects include the Annenberg Performing Arts Center in Beverly Hills, the Google Los Angeles headquarters, Red Bull North America headquarters, the Wilshire Boulevard Temple restoration in Los Angeles, multiple buildings at Dreamworks, Warner Bros. and Sony Pictures, and many others. David currently serves on the EERI Board of Directors, the SEI Board of Governors and has served on numerous Boards for the Structural Engineers Association in California, and on the Board of numerous preservation organizations. He is also the Managing Director of SAFEq Institute, an expert resource for building owners, risk managers, engineers, and local jurisdictions seeking to minimize facility and business interruption losses caused by disasters by establishing a program for first response post-disaster inspections.

SUPPLEMENTAL ACTIVITIES

Coffee hour with students

In this one-hour meeting, Mr. David Cocke gave students a lot of useful suggestions on their future career. Since most students in the coffee hour will graduate soon, they asked many questions on how they can perform well in their career. Some students also asked questions on how a structural company operates and negotiates with other parties during the construction process. Mr. Cocke gave answers to all these questions.

Meeting with Dr. Rachel Sangree

Dr. Sangree teaches concrete and steel design for many years in our department. They discussed what knowledge a structural engineer needs in their daily work and how to build the bridge between in-school training and structural profession.

RESULTS, FEEDBACK AND LESSONS LEARNED

The professional visit turns out to be very successful and helpful. In the seminar, Mr. David introduced the projects from his own company, which attracts the audience. The coffee hour gives students the opportunity to discuss their career with Mr. Cocke as well.

ACKNOWLEDGEMENTS

The Johns Hopkins University EERI Student Chapter gratefully acknowledges the support of the Friedman Family for sponsoring the travel of Mr. Cocke through their Friedman Family Visiting Professional Program endowment.
