Tsunami

Event Name/Date: ___________________________ Name of investigator: ___________________________

Short description of observation: ___________________________ Date of observation: ___________________________

I. Location: (please be as detailed as possible):

a. Descriptive: __________________________________________

b. Street:

<table>
<thead>
<tr>
<th>Address Number</th>
<th>Direction (N, S, E, W)</th>
<th>Street Name</th>
<th>Suffix (Rd, St, Ave)</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Cross Street (if available):

|                        |                        |             |                      |
|                        |                        |             |                      |

c. City: ___________________________
d. County: ___________________________
e. Zip: ___________________________

f. Map Reference (Quad, etc.): ___________________________ g. Latitude: ___________________________

h. Longitude: ___________________________
i. Thomas Bros. Page: ___________________________
j. Station ID: ___________________________

II. Wave Characteristics:

Indicate the location and type of water body where wave was observed (open coast, bay, harbor, estuary):
_______________________________________________________________________________________

Indicate the direction the wave came from:
_______________________________________________________________________________________

What was the water condition before the tsunami waves arrived?
_______________________________________________________________________________________

Indicate the nature of the wave(s):
_______________________________________________________________________________________

Did the water recede before the first tsunami wave arrived?
_______________________________________________________________________________________

Give times and heights for waves at this location:

<table>
<thead>
<tr>
<th></th>
<th>Times</th>
<th>Heights</th>
</tr>
</thead>
<tbody>
<tr>
<td>First Wave:</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Second wave:</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Third wave:</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Other waves:</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>
Tsunami (continued)

How far inland (in feet) did the water travel from high-tide shoreline? If you do not know, describe the place farthest inland where water was noticed:

Suggestions for further investigation:

III. Miscellaneous:

Film/Video or digital images (include filename and/or roll information):

Sketches/Comments:
